DETAILED ACTION

Prelim./Amdt.

1. Receipt is acknowledged of amendment filed 01/18/2006.
2. Claims 1-28 are pending.

Allowable Subject Matter

3. Claims 1-28 are allowed.
4. The following is an examiner's statement of reasons for allowance: The equation that the inclination angle formed by the light incident surface with respect to the normal line of the light exiting surface is smaller than or substantially equal to $(90 - 2 \sin)^{-1}(n_2/n_1))^{\circ}$ is known in the art of illumination for providing a critical angle to a light guide. However, no other prior art discloses that the first light incident surface of a light guide is inclined inwardly from the light exiting surface for providing space to the lamp electrode line and the inclination angle is formed by the equation above. Further, in the examiner's opinion, it would not have been obvious to a person of ordinary skill in the art to apply the equation above to a light incident surface of a light guide.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
